DETAILED ACTION

Drawings

1. The drawings were received on October 4, 2006. These drawings are acceptable.

Response to Arguments

2. Applicant's arguments, see the remarks, filed October 4, 2006, with respect to the previously set forth objections and rejections under 35 USC 112 1st and 2nd paragraphs have been fully considered and are persuasive in light of the amendments to the claims, rendering the previous grounds of rejection and objection moot.

Allowable Subject Matter

3. Claims 1-9 and 11-14 are allowed.
4. The following is an examiner's statement of reasons for allowance:
5. The main reason for the allowance of claim 1 is that the prior art fails to teach a secondary electron detector where the detector comprises a detector chamber coupled to a vacuum pump for maintaining the detector in vacuum, and where a wall of the detector chamber near an active surface of the sensor is closed by an electrically conductive grid, the orifices of the grid defining a plurality of electrostatic microlenses. USPN 7,060,978 to Drexel et al. for example has a further side chamber enclosing a detector, but no associated pump, and the grid (Item 14) is not disclosed as defining an electrostatic field such that a lensing effect is produced, therefore indicating that a plurality of microlenses are not created in the Drexel et al.
6. Claims 2-9 and 11-14 are allowable by virtue of their dependency.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
